## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Neff (5,979,134).

Regarding claims 1 and 4-5, Neff discloses a device for suspended ceilings comprising a first cross member having an upper face and a second cross member extending from the first cross member at an angle of 90° (126 and 122 on fig. 7). The first and second cross members having an upwardly extending retention and guide lips and having a slot formed therein (124 on fig. 7). Where the first and second cross members both include two co-aligned arms, where the co-aligned arms of the second cross member are disposed between the arms of the first cross member.

Regarding claim 2, Neff discloses a device as describe in claim 1 where the first cross member includes one bottom arm (122 on fig. 7) and the second cross arm includes two side arms (126 on. Fig. 7).

Regarding claim 3, Neff discloses a device as described in claim 1, where the first cross member includes two, top and bottom, arms and where the second

cross member includes one side arm disposed between the arms of the first cross member, each of the arms having a retention lip.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Neff.

Regarding claim 6, Neff discloses the device as described in claims 1 and 5 but does not disclose an eyelet proximate a 90° connection of the said cross members. However, in another embodiment of the ceiling system, Neff discloses a device attached to the main-tee (68 on fig. 1) that includes an eyelet to which a wire can be attached (78 on fig. 1). It would have been obvious to one skilled in the art to modify the second embodiment of Neff to include the eyelet of the first embodiment. One would be motivated to make such a modification to allow for the alignment of any portion of the grid.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson (3,456,702).

Regarding claim 7, Johnson discloses the basic method of removably attaching a squaring device (see fig. 1) to a main-tee, said device having means for supporting and maintaining a cross-tee at 90° and permanently connecting the

cross-tee to a main wall angle while held at 90° with respect to said wall and main-tee (see fig. 1 and abstract).
